PROFILE

MERN stack developer experienced in building full-stack, real-time web applications with React, Next.js, Node.js, Express, and MongoDB. Comfortable across the stack — from interactive frontend UI and state management to REST API design, authentication, and role-based access control. Backed by customer-facing experience in communication and problem-solving. Currently pursuing a B.Sc. in Computer Science and Information Technology.

PROJECTS

Sizzly – Real-Time Pizza Ordering Platform — Personal Project

- Architected a full-stack, real-time pizza ordering web app using Next.js 16 (App Router), React 19, TypeScript, and MongoDB/Mongoose.
- Built a custom Node.js server integrating Socket.IO with Next.js to power room-based WebSocket channels for live order tracking between customers and admins.
- Developed an interactive Custom Pizza Builder with Zustand state management, featuring real-time price recalculation and dynamic ingredient selection.
- Implemented Role-Based Access Control (RBAC) with NextAuth.js and middleware to secure admin dashboards, checkout flows, and protected API routes.
- Automated inventory monitoring with node-cron and Nodemailer to run background stock checks and trigger low-stock email alerts.

Vael – E-commerce Platform — Personal Project

Live: vael-nine.vercel.app

- Built a full-featured MERN e-commerce platform with separate user-facing storefront and admin dashboard, deployed and publicly accessible.
- Designed and implemented secure authentication with token/session handling, protecting user accounts and checkout flows.
- Developed the shopping cart and checkout flow end-to-end, covering item management, order summary, and order placement.
- Built product search and filtering (category, price, and other attributes) to help users navigate the catalog efficiently.
- Created an admin dashboard with analytics for tracking orders, products, and store performance in real time.
- Designed and structured REST APIs with Node.js and Express, backed by MongoDB for persistent data storage.

WORK EXPERIENCE

Customer Service Representative — Kalash Services Pvt. Ltd, Jawalakhel, Lalitpur *Aug – Nov*

- Handled inbound customer calls, resolving queries and routing tickets to the appropriate internal teams.
- Supported sales of internet connection packages, building strong communication and client problem-solving skills through daily interaction.

EDUCATION

B.Sc. in Computer Science and IT — Patan Multiple Campus, Lalitpur *2023 – Present*

Higher Secondary Education (+2) — Omega College, Kumaripati, Lalitpur *2022*

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap

Backend & Database: Node.js, Express, MongoDB, REST APIs, Socket.IO

Tools & Testing: Git, GitHub, Postman, Selenium
