Anuj Bajracharya

has successfully completed the online Specialization

Selenium Python Automation Testing and Frameworks

Congratulations on successfully completing the Selenium Python Automation Testing from Scratch and Frameworks course! You have embarked on an immersive journey into Selenium automation, mastering foundational concepts and advanced techniques. You have gained hands-on experience with Python basics, WebDriver methods, various locators, and synchronization techniques. By exploring tools like Pytest, you applied your knowledge to build robust automation frameworks, handling everything from exceptions to advanced user interactions. Your comprehensive projects and understanding of end-to-end framework development showcase your expertise in Selenium Python automation testing. Well done!
